Marketing and Business Development

PROFILE

More than ten years in sales and marketing. I built up the Swiss office of a DACH agency and sold programmatic campaigns for a national out-of-home advertising company. In the construction industry, I led a marketing team. I became self-employed in 2023 and founded digital M. GmbH in 2024. I still run it part-time. Most recently I was responsible for new business, marketing and innovation at a creative agency. I start conversations with decision-makers. And I turn them into closed deals. For me, a campaign is only finished once I know what it delivered.
